

**Job Title:** Front-end Developer

**Location:** Edinburgh, Scotland (Relocation Assistance Available)

**About Us:**

Malt AI's platform allows enterprises to build custom AI solutions containing "distilled" Large Language Models (LLMs), trained on their proprietary data in a secure environment. They use "knowledge distillation" to inject domain-specific knowledge into LLMs, which allows small, focused models to scale in production. Malt AI's founders are top PhDs who are experts in applying LLMs to real-world information problems. They recently won the multi-million dollar Amazon Alexa Challenge, beating 125 of the leading AI teams from around the globe, and are a 2023 Sequoia Rising Star.

**Job Description:**

As a Front-end Developer at Malt AI, you will be integral in shaping the face of our AI platform. We're looking for a creative and skilled individual passionate about building intuitive and dynamic user interfaces that encapsulate the power of our backend AI systems. The right candidate will be adept at translating complex processes into clear, user-friendly experiences both for clients and internal use.

**Responsibilities:**

- Develop robust, scalable, and high-quality front-end applications and annotation interfaces for our AI platform
- Collaborate with UX/UI Designers to implement interactive design concepts
- Ensure the technical feasibility of UI/UX designs while maintaining a coherent user experience across all products
- Optimize applications for maximum speed, scalability, and readability
- Utilize a variety of markup languages to write web pages
- Take ownership of code quality, including writing tests and performing code reviews
- Stay up-to-date with emerging front-end technologies and best practices

**Qualifications:**

- Bachelor's degree in computer science or a related field, or equivalent experience
- Deep understanding of front-end technologies: HTML5, CSS3, and JavaScript/ES6+
- Experience with multiple modern JavaScript libraries such as React & Vue.js
- Proficiency in responsive design
- Working knowledge of version control systems like Git
- Familiarity with RESTful API integration
- Solid understanding of cross-browser compatibility issues and ways to work around them
- Excellent problem-solving, communication, and teamwork skills

**Benefits:**

- Competitive salary and stock options
- Relocation assistance for candidates moving to Edinburgh
- A fast-paced start-up culture with abundant professional development opportunities
- State-of-the-art work environment with access to the latest tools and technologies
- Inclusive team culture with regular social events and team-building activities

If you are ready to join a pioneering AI company and contribute to its success, we invite you to apply and be a part of Malt AI's exciting journey.

**Note:** Malt AI is an equal opportunity employer, and we encourage candidates from all backgrounds to apply.
